DETAILED ACTION

Election/Restrictions

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - I. Claims 1-7 and 10-20, drawn to a semiconductor device, classified in class 257, subclass 368.
 - II. Claims 8-9, drawn to a method of fabricating the semiconductor device, classified in class 438, subclass 301+.

The inventions are distinct, each from the other because of the following reasons:

2. Inventions I and II are related as process of making and product made. The inventions are distinct if either or both of the following can be shown: (1) that the process as claimed can be used to make other and materially different product or (2) that the product as claimed can be made by another and materially different process (MPEP § 806.05(f)). In the instant case the product as claimed can be made by another and materially different process. For instance, the source and drain region can be formed prior to forming a gate structure on a substrate.
3. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.
4. Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Claim Objections

5. Claims 11-20 are objected to because of the following informalities: the phrase "The apparatus of claim..." as recited in claims 11-20 should be changed to --The semiconductor of claim ...-- Appropriate correction is required.
